

## **SELECTION CRITERIA**

There are 10 places available for each Biochemistry minor subject(134, 135). Should the subject be over subscribed, places will be offered on a merit system.

For Natural Scientists, we take your 3 subject scores in NST IB, add in your Biochemistry (BMB) IB mark again (i.e. give double weighting to your performance in Biochemistry) and prepare a ranked order of merit based on the 3 subjects plus Biochemistry mark. For students taking CDB but not Biochemistry in NST IB, we treat your CDB mark in the same way as the Biochemistry mark.

For Medical and Veterinary students, we take your IB performance (total) and adjust it to give a total out of 300 (i.e. bring it in line with the NST total), then your performance in MVST IA MIMS is added in and the revised total (out of 400) is produced.
