

### **Selection criteria for BBS Minor Subject Science Communication**

The Selection Criteria below will be used in the event that more students apply for the module than places are available. Criteria to be considered in the order listed:

1. A written 300-word response to the question: 'Please outline, in 300 words, why you wish to undertake this particular BBS Minor module'. Priority to go to students who demonstrate greater enthusiasm for science communication, interest in it and knowledge about it.
2. Academic grades in their degree course so far.
